

MCSA Windows Server 2016

This course is developed for IT professionals who need to design, plan, implement, manage and support Microsoft Windows 2016 networks or who plan to take the related MCSE and MCSA exams. The training will be given by Senior System/Network engineers with several years of field experience.

ZOOM
TECHNOLOGIES

Installation, Storage, and Compute with Windows Server 2016 - (Exam :70-740)

Course Outline

- 1. Installing, upgrading, and migrating servers and workloads**
 - Introducing Windows Server 2016
 - Preparing and installing Nano Server and Server Core
 - Preparing for upgrades and migrations
 - Migrating server roles and workloads
 - Windows Server activation models
- 2. Configuring local storage**
 - Managing disks in Windows Server
 - Managing volumes in Windows Server
- 3. Implementing enterprise storage solutions**
 - Overview of DAS, NAS, and SANs
 - Comparing Fibre Channel, iSCSI, and Fibre Channel over Ethernet
 - Understanding iSNS, DCB, and MPIO
 - Configuring sharing in Windows Server 2016
- 4. Implementing Storage Spaces and Data Deduplication**
 - Implementing Storage Spaces
 - Managing Storage Spaces
 - Implementing Data Deduplication
- 5. Installing and configuring Hyper-V and virtual machines**
 - Overview of Hyper-V
 - Installing Hyper-V
 - Configuring storage on Hyper-V host servers
 - Configuring networking on Hyper-V host servers
 - Configuring Hyper-V virtual machines
 - Managing virtual machines
- 6. Deploying and managing Windows and Hyper-V containers**
 - Overview of containers in Windows Server 2016
 - Deploying Windows Server and Hyper-V containers
 - Installing, configuring, and managing containers by using Docker

7. Overview of high availability and disaster recovery

- Defining levels of availability
- Planning high availability and disaster recovery solutions with Hyper-V virtual machines
- Backing up and restoring by using Windows Server Backup
- High availability with failover clustering in Windows Server 2016

8. Implementing failover clustering

- Planning a failover cluster
- Creating and configuring a new failover cluster
- Maintaining a failover cluster
- Troubleshooting a failover cluster
- Implementing site high availability with stretch clustering

9. Implementing failover clustering with Windows Server 2016 Hyper-V

- Overview of the integration of Hyper-V Server 2016 with failover clustering
- Implementing Hyper-V VMs on failover clusters
- Key features for VMs in a clustered environment

10. Implementing Network Load Balancing

Overview of NLB

- Configuring an NLB cluster
- Planning an NLB implementation

11. Creating and managing deployment images

- Introduction to deployment images
- Creating and managing deployment images by using MDT
- Virtual machine environments for different workloads

12. Managing, monitoring, and maintaining virtual machine installations

- WSUS overview and deployment options
- Update management process with WSUS
- Overview of Windows PowerShell DSC
- Overview of Windows Server 2016 monitoring tools
- Using Performance Monitor
- Monitoring event logs

Networking with Windows Server 2016 - (Exam: 70-741)

Course Outline

1. Planning and implementing an IPv4 network

- Planning IPv4 addressing
- Configuring an IPv4 host
- Managing and troubleshooting IPv4 network connectivity

2. Implementing DHCP

- Overview of the DHCP server role
- Deploying DHCP
- Managing and troubleshooting DHCP

3. Implementing IPv6

- Overview of IPv6 addressing
- Configuring an IPv6 host
- Implementing IPv6 and IPv4 coexistence
- Transitioning from IPv4 to IPv6

4. Implementing DNS

- Implementing DNS servers
- Configuring zones in DNS
- Configuring name resolution between DNS zones
- Configuring DNS integration with Active Directory Domain Services (AD DS)
- Configuring advanced DNS settings

5. Implementing and managing IPAM

- Overview of IPAM
- Deploying IPAM
- Managing IP address spaces by using IPAM

6. Remote access in Windows Server 2016

- Overview of remote access
- Implementing the Web Application Proxy

7. Implementing Direct Access

- Overview of DirectAccess
- Implementing DirectAccess by using the Getting Started Wizard
- Implementing and managing an advanced DirectAccess infrastructure

8. Implementing VPNs

- Planning VPNs
- Implementing VPNs

9. Implementing networking for branch offices

- Networking features and considerations for branch offices
- Implementing Distributed File System (DFS) for branch offices
- Implementing BranchCache for branch offices

10. Configuring advanced networking features

- Overview of high performance networking features
- Configuring advanced Microsoft Hyper-V networking features

11. Implementing Software Defined Networking

- Overview of SDN.
- Implementing network virtualization
- Implementing Network Controller

Identity with Windows Server 2016 - (Exam: 70-742)

Course Outline

1. Installing and configuring domain controllers

- Overview of AD DS
- Overview of AD DS domain controllers
- Deploying a domain controller

2. Managing objects in AD DS

- Managing user accounts
- Managing groups in AD DS
- Managing computer objects in AD DS
- Using Windows PowerShell for AD DS administration
- Implementing and managing OUs

3. Advanced AD DS infrastructure management

- Overview of advanced AD DS deployments
- Deploying a distributed AD DS environment
- Configuring AD DS trusts

4. Implementing and administering AD DS sites and replication

- Overview of AD DS replication
- Configuring AD DS sites
- Configuring and monitoring AD DS replication

5. Implementing Group Policy

- Introducing Group Policy
- Implementing and administering GPOs
- Group Policy scope and Group Policy processing
- Troubleshooting the application of GPOs

6. Managing user settings with Group Policy

- Implementing administrative templates
- Configuring Folder Redirection, software installation, and scripts
- Configuring Group Policy preferences

7. Securing Active Directory Domain Services

- Securing domain controllers
- Implementing account security
- Implementing audit authentication
- Configuring managed service accounts

8. Deploying and managing AD CS

- Deploying CAs
- Administering CAs
- Troubleshooting and maintaining CAs

9. Deploying and managing certificates

- Deploying and managing certificate templates
- Managing certificate deployment, revocation, and recovery
- Using certificates in a business environment
- Implementing and managing smart cards

10. Implementing and administering AD FS

- Overview of AD FS
- AD FS requirements and planning
- Deploying and configuring AD FS
- Overview of Web Application Proxy

11. Implementing and administering AD RMS

- Overview of AD RMS
- Deploying and managing an AD RMS infrastructure
- Configuring AD RMS content protection
- Configure AD RMS content protection.

12. Implementing AD DS synchronization with Microsoft Azure AD

- Planning and preparing for directory synchronization
- Implementing directory synchronization by using Azure AD Connect
- Managing identities with directory synchronization

13. Monitoring, managing, and recovering AD DS

- Monitoring AD DS
- Managing the Active Directory database
- Active Directory backup and recovery options for AD DS and other identity and access solutions
