

The all new Cisco Certified Network Professional (CCNP®) has 3 modules ROUTE, Switch & TSHOOT validates the ability to plan, implement, verify and troubleshoot local and wide-area enterprise networks. The CCNP certification is appropriate for those who are ready to advance their skills and work independently on complex network solutions. The course covers topics like EIGRP, OSPF, BGP, IPv6, VPNs, L2 / L3 Switching, VLAN, VTP, HSRP, VRRP, GLBP, VOIP, Wireless, Troubleshooting methods. The CCNP course training will be provided by Senior Network / WAN Engineers with several years of field experience.

Course Contents

- Route – (642-902)
- Switch – (642-813)
- TSHOOT – (642-832)
- +
- Introduction to CCIE
- Introduction to Network Security & Ethical Hacking
- Overview on Satellite Broadcasting & Radio Networks

CISCO
CCNP

BGP+HSRP+VOIP
+Troubleshooting
+ Practicals

Course Available at Ameerpet Office

We are not an Affiliated Institution. Trademarks are properties of the respective vendors.

COURSE DETAILS

ROUTE – (642-902)

Enhanced Interior Gateway Routing Protocols – EIGRP

- Establishing Neighbors
- Topology Table
- IP Routing Table
- Optimizing EIGRP Convergence
- Route Filtering
- Route Summarization
- Authentication

Open Shortest Path First - OSPF

- Planning
- Verification
- Configuration
- Neighbors
- Adjacencies Formation (on LAN & WAN)
- Link State Advt – LSAs
- Link State Database
- Route Filtering & Summerization
- Areas & Special Areas
- Authentication
- Virtual Links

Path Control

- Redistribution into EIGRP
- Redistribution into OSPF
- Redistribution with Distribute Lists
- Redistribution with Route Map
- Policy Based Routing – PBR

Border Gateway Protocol – BGP

- Internal BGP
- External BGP
- Neighbors
- Verifying BGP Tables
- Route Filtering

IPv6

- IPv6 Addressing
- IPV6 Routing
- Configuring IPv6 Address
- Tunnels

Broadband Technologies

Virtual Private Network (VPN)

SWITCH – (642-813)

Building Campus Network

- Layer 2 Switch
- Layer 3 Switch
- Tables used in Switching
- Switch port Configuration
- VLANs & VLAN Trunks
- VTP
- STP & PVST+
- Adv. STP (RSTP & MST)
- Inter VLAN Routing
- Multi-Layer Switching (MLS)

Designing Campus Networks

- Hierarchical Network Design
- Modular Network Design
- Router Redundancy in Multilayer Switching
- HSRP
- VRRP
- GLBP

Campus Network Services

- IP Telephony
- Wireless LANs

Securing Switched Networks

- Port Security
- Port-based Authentication
- Mitigating Spoofing Attacks
- Best practices for Securing Switches

TSHOOT – (642-832)

- Securing Switched Networks
- Introduction to Network Maintenance
- Introduction to Troubleshooting Process
- Maintenance & Troubleshooting
- Basic & Adv. Cisco Catalyst Switch Troubleshooting
- Introduction to Troubelshooting Routing Protocols
- Security Troubleshooting
- IP Services Troubleshooting
- IP Communications Troubleshooting
- IPv6 Troubleshooting
- Advanced Services Troubleshooting
- Large Enterprise Network Troubleshooting
