About Zoom

Zoom Technologies is a pioneer in providing cybersecurity and cyber forensics solutions. Our clients are spread across the entire spectrum including defence, space research, banks, governments, financial institutions, universities, railways, hospitals, police departments etc. We are leaders in the field of network, cloud technologies, cybersecurity, & cyber forensic solutions & training. Since our inception over two decades ago, we have trained over two hundred thousand engineers. We offer a world class learning environment with the best lab infrastructure and faculty with real industry experience gained by working on live projects of national importance.

There is a high demand for cybersecurity & SOC professionals at all times. Apart from job opportunities in India and the Middle East, network and cybersecurity engineers are also sought-after in the US, Canada & Europe.

Brief on US-Council :

US-Council, is one of the global leaders in cybersecurity & digital forensics certification. US-Council has grown to become one of the most recognized organizations in the field of information security. US-Council also helps Corporates, Governments, Defence, Banks, Hospitals, Police departments to learn & protect their networks. Our trainings develop deep into the learning requirements of cybersecurity professionals worldwide to identify the challenges they face on job.

US-Council is a Multidisciplinary Institution of Global Information Security Professional Services. US-Council is a dedicated Information Security Organization that aims at creating knowledge, facilitating innovation, executing research, implementing development, and nurturing subject matter experts in order to provide their unique skills and niche expertise in cybersecurity & digital forensics.

At US-Council, the mission is clear – to make the digital world a safer place. This is no small task, but we believe that spreading awareness about the vulnerabilities of the World Wide Web and digital systems, and providing robust education, is key to achieving this goal. Our mission is to empower individuals, organizations, government agencies, and law enforcement with the knowledge and skills necessary to protect their networks and data from malicious intruders and cybercriminals, and to help government agencies extract digital evidence for cybercrime investigations.

The cybereye by US-Council courses are designed with one primary focus: to secure the network, data, and privacy of individuals and organizations, and to extract digital evidence, regardless of the equipment and software they use. They strives to ensure that the courses provide the most up-to-date and practical education, enabling cybersecurity experts to effectively respond to and mitigate cyber threats, and enabling digital forensic experts to overcome emerging digital forensic challenges.
